

## I. DATA EXTRACTION

### Historical Corpus

*Gazetteers, reports,  
treaties, travelogues*

*script.py*

### Corpus TXT

*Normalized and  
OCR-repaired text*

*Textrazor.py*

### NER Extraction

*Entities, confidence,  
relevance scores*

## II. THEMATIC ANALYSIS

### Selected Topics

*Manual refinement  
of modelled themes*

*Manual filtering*

### Topic Modeling

*Unique historical  
themes*

*Refined themes*

*NER results*

## III. KNOWLEDGE MAPPING

### Co-occurrence

*Context windows  
(+/-50 words)*

*relation.py*

### Relation Extraction

*Subject-relation-object  
triples*

### Knowledge Graph

*Moral economies and  
colonial bureaucracy*

*update\_config.py*

## IV. GRAPH REFINEMENT

### Config Update

*Entity aliases and  
type overrides*

*correct\_entity\_types.py*

### Entity Type Correction

*Cross-referenced  
NER types per entity*

*regenerate\_html.py*

### Interactive Graph

*Browser-based  
HTML visualization*
